FOOTBALL HONORS GO TO THE SOUTH

Georgia Tech Has Highest Total for Teams, Gilroy for Individuals.

(By Associated Press)
NEW YORK, Dec. 4.—The close of the intercollegiate football season finds both the team and individual scoring honors held by a Southern eleven and player. A comparison of the records of the leading teams of the East, South, and Middle West shows that the Georgia Tech. combination scored 429 points in nine games with Georgetown University a close second with 412 while Left Halfback Gilroy, of Georgetown, leads the individual point collectors with a total of 139 points and Oliphant, of the Army team, is second with 112.

Gilroy has scored eighteen touchdowns and thirty-one goals during the season to date and still has a chance to increase these figures in the contest to be played against Tulane at New Orleans on December 9. Oliphant's record is a more versatile one since he has made thirteen touchdowns, twenty-two goals and four field goals. Maubetsch, of Michigan, is a close third with twelve touchdowns, 21 goals and one field goal. None of these players equalled the record made by Capt. Barrett, of the Cornell eleven, of last year, for the latter rolled up a total of 162 points with twenty-two touchdowns, twenty-seven goals and one field goal. Gilroy was second in 1915 with ninety-six points and Hastings of Pittsburgh third with seventy-six.

The records of the leading eleven in total points scored and the players who have collected the largest number of points, individually, follow:

Transplanting Kidneys.
The transplanting of kidneys has been done by Enderlin, Borst and Unger. Unger has succeeded in removing both kidneys from a bulldog and immediately substituting the kidneys of a fox terrier. The new kidneys took up their function promptly and the dog seemed to suffer little from the shock. In Berlin a diseased kidney was removed from a young woman and the kidney of an anthropoid ape substituted successfully.

Making Billiard Balls.
The experience of the workers in ivory for billiard balls has shown that as it dries ivory shrinks. The tusks of the cow elephant have been found best adapted to the making of billiard balls. The tusk of the female is not so curved as that of the male, and the fine nerve passage is not so clearly seen. Billiard balls are turned in the rough and kept in a warm room for a long time, sometimes as long as two years. Then after shrinking they are turned again.

Methods of Recuperation.
The scholar who has broken down after overwork, who is capable of controlling and even abusing his attentive powers, does not require a re-development of attentive control, but should be prevented from introspection. For him light literature, games of patience, and jig-saw puzzles are useful. For the society woman who has never concentrated her attention on anything more serious than a tango or a comedy, exercises requiring more effort of concentration should be advised.

HAVE YOU EVER NOTICED THE ATHLETES WITH LONG NOSES
GENERALLY DELIVER THE GOODS IN LARGE PACKAGES?

THE BEAKS OF BASEBALL: LEFT TO RIGHT, HONUS WAGNER, BUCK HERZOG, HANS LOBERT.

By PAUL PURMAN.

Let us stop a minute and consider the classic beaks of baseball.

What's the use, you ask, what have beaks got to do with baseball?

Very well, maybe they haven't, but you can't prove it.

And just for that we'll refer you to the powerful roster of one Hans Lobert. There is perhaps no more wonderful nose in the old United States. A side view of Lobert's beak is

worth the full price of admission. It looms up like a turret on a Gothic fort and makes the rest of his landscape fade into inconsequence.

And Honus Wagner. It's not up to us to declare that Wagner's nose kept him in baseball for a score of years, but after sizing up Wagner's pugnacious proboscis, you can't deny that it may have had something to do with it.

And Heinie Zimmerman. Zim's classic beauty would retrograde into plain homeliness if it wasn't for his handsome horn of Cyclopean proportions.

There's old Hooks Wiltse. Someone once said Wiltse got his name from the brand of curves he used to pass out, but it's an even money bet that the first guy that called him "Hooks" did it after getting a slant at his eagle-like beak.

The sharp hooked beak of Al Demaree has caused crowds of ball fans to forget his curves while they sized up the artistic lines of his eagle-like snout. And don't overlook Buck Herzog, whose 100 per cent. nose is one of the seven wonders of New York.

MUCH INTEREST IN "Y" BOWLING

West Virginians and Hartleys in Close Race for Tail End.

Rolling on the "Y" alleys is now creating such an interest among the members of the teams that sometimes the bowlers have to be chased off the alleys at ten o'clock when the building closes. The Traction company is now tied with Monongah Glass for first place in the Commercial League.

Sawing Diamonds a Trade Secret.

The operation of sawing diamonds, although it would seem to be simple, involves a great deal of technical knowledge and is really a trade secret that is carefully guarded to such an extent that it is followed as a separate trade, and some of the large establishments that conduct all of the other operations do not attempt to saw their stones, but send them out to shops that make a specialty of this branch of work.

Have Birth in Forest Fires.

So hard is the cone of a pine in the western forests of America that the imprisoned seeds cannot be propagated in the ordinary way. The best way is to burn the cone over a hot fire until it bursts, when the seeds escape. When forest fires sweep the country these pine cones have their chance, and from them new trees grow.

Early History of Diamond.

When the diamond was discovered is matter of dispute among historians, although the evidence now existing in the British Museum and in the Bibliotheque Nationale of France would show that it was first introduced to the Greeks about 500 B. C. from India, where it must have been mined at an early date. By the Greeks it was known as "the invincible," a term suggested doubtless by the lavish display of the gem by Lais and Phrya (or Phrya as she is sometimes called), and Thais, the mistress of Alexander.

TWO FLOOR GAMES AT "Y" TONIGHT

Two basketball games at the "Y" tonight will place on exhibition the best floor talent in the senior classes at the association, when the West meet the Drys at 7:45 and the Suffs play the Ants at 8:45.

Had Bronchial Asthma

So Badly Man Could Not Lie Down—Cured by Vinol

For years and years we have been telling the people of Fairmont that Vinol is a wonderful remedy for bronchial troubles. Here is positive proof: Tilden, Ill. "For five years I suffered from bronchial asthma. In the winter time I was obliged to sit in a Morris chair all night, as I could not lie down, owing to that dreadful choking sensation. I tried nearly every known remedy, but nothing gave me any relief until one day I met the Station Agent at Willsville, Ill., and he said he had been cured by Vinol. I at once commenced to take it, and the result is my cough is gone, my appetite has improved, and I can lie down and sleep all night, and my experience leads me to believe that Vinol is a certain remedy for bronchial asthma." John H. Condell, Tilden, Ill.

The reason that cough syrups fail in such cases is because they are palliative only, while Vinol removes the cause, being a constitutional remedy in which are combined beef and cod liver concentrates, iron and manganese, peptonates, and glycerophosphates. It strengthens and revitalizes the entire system and assists nature to expel the disease.

FULTZ VS. HERRMANN, FEATURE BOUT ON BASEBALL CARD FOR STOVE LEAGUERS

AUGUST HERRMANN

DAVE FULTZ

Fultz vs. Herrmann, the next bout on the baseball card, will furnish stove league fans with about all the excitement they can stand during the baseball-less days of December and January.

In Herrmann's corner will be Ban Johnson, John Tener and a score of major league magnates, while Fultz's towel swingers will comprise directors of the ball players' fraternity.

The bell will ring for the first round when the national commission meets in New York and from early dope the fight seems to be scheduled to go to the limit.

Reversing Order of Things.

Amos coaxed his father to lie beside him while he was going to sleep one night. Father slept first. After some time he awakened, amazed to find Amos had taken off one shoe and was struggling with the tie of the other. When asked what he was doing, Amos, with no concern, said: "Just putting you to bed, father."

High Chairs.

High chairs of many sorts were provided for the youngest children in colonial days. One such was brought to America in 1675 by Richard Mather. It was subsequently used by Samuel Increase, Cotton and the rest of the family. This chair is now a show piece at the American Antiquarian society's rooms at Worcester, Mass.—New York Telegram.

Wicked Pilot Snake.

The pilot snake is this country's boldest, baddest nest robber, which, despite the fact that he is entirely nonvenomous, makes him a not particularly desirable resident, especially to the mind of the blacksnake, resembling between the two being so close that wickedness of the first frequently redounds to the discredit of the latter.

"Tobacco" Not Named From Plant.

The term "tobacco" is indeed derived not from the plant, but from an instrument sharply described in 1588 by Oviedo as a "small, hollow, wooden tube shaped like a letter 'Y,' the two points of which are inserted in the nose of the smoker, the other end held into the smoke of burning tobacco, and thus the fumes are inhaled."

The Spirit of Christmas

THE spirit of Christmas is the spirit of service! The faithful carrier of parcels in Charles Dickens' "The Cricket of the Hearth" was an embodiment of this spirit.

John Peerybingle typified personal service in transportation for his day and age. He never dreamed—Charles Dickens never dreamed—of the magnitude of Wells Fargo Service, nor of its thousands of devoted expressmen, upon whose efficient work the convenience, comfort, and pleasure of so many depend.

Steadily the express has built its reputation for both fidelity and dispatch in the handling of its business; yet it is in the flood-tide of Christmas shipments that its service is put to the greatest test.

It is at this time that Wells Fargo needs most the co-operation of its patrons in order that it may handle without delay its millions of Christmas packages. Therefore we make an earnest request that you ship early this Christmas. To help you do this we furnish attractive labels requesting the recipient of your packages not to open them until Christmas day.
